## Special purpose car production Nuevo mobile work vehicle

As lifestyles diversify, this is the vehicle that people are requesting. It is a production vehicle requested by individual customers from public institutions, for purposes such as mobile work vehicle, mobile experiment vehicle, mobile consultation vehicle, and road heating vehicle.

This is a product that does not use any alcohol ingredients, and has no problems of product deterioration while it functions like a conventional perfume for indoor environments and textiles, making it appropriate for an era when indoor purification is essential due to fine dust and various pollutions.

## MAJOR CUSTOMERS

- Experimental vehicle salesperson who requests an experimental vehicle for research purposes
- Companies supplying Korean cars to government offices and institutions
- Companies that distribute automobile interior goods or gift products
- Lorry distributors
- Automobile Importer
- Korea Household Goods Importer
- Broadcasting Companies
- Authorized (VIP, etc entertainment companies)
- Automobile producers and distributors / suppliers

If Nuevo has an advantage, it is that there is no other company that can simultaneously manufacture, restructure, and maintain a car, work that can be carried out in the form of an exclusive business group when the company progresses to the automobile inspection and aftercare platform.

For the purpose of technical education and follow up management by the head office, we will establish branches in Korea through the franchise business, proceed from car sales to maintenance and follow up management, strengthen the brand, and distribute the parts necessary for production / change. This will result in cost savings and additional revenue from logistics fees.

Beyond this, additional profits will be generated from auto aftermarkets, and the company's growth will increase significantly within the next three years due to the distribution of import and export products through branch offices in China and Vietnam. In the future, the company aims to develop and develop electric vehicles to address changing market needs, such as R&D and driverless vehicles.
